

## STUDY PARTICIPANTS NEEDED

We are looking for families concerned about hereditary breast and ovarian cancer (HBOC) syndrome.

**Goal:** We evaluate a digital health platform called the “Family Gene Toolkit”.

We want to know how to best present accurate and reliable information about HBOC to families.

### WHO CAN PARTICIPATE?

adults:  $\geq 18$  years old;  
able to read and understand either German, French, Italian or English;  
individuals identified with a pathogenic variant in the *BRCA1* or *BRCA2* genes;  
have at least one adult living relative;  
have access to the internet

### WHAT WILL I DO?

- Step 1: answer a 30 min survey
- Step 2: test the digital platform
- Step 3: **invite your blood relatives to also test the digital platform.** Only then we can find out if the whole family profits!
- Step 4: answer 30 min survey 2- and 6-months later
